

Mottatt Terminal/Innlevering -> Startbilde

1 – Skanne Fraktbrev

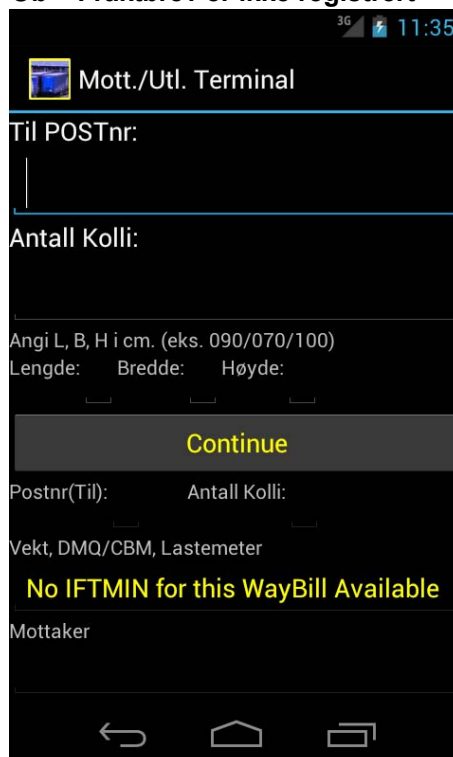

2 – Get.....(henter fraktbrevinfo. fra IFTMIN/transportsiden.no

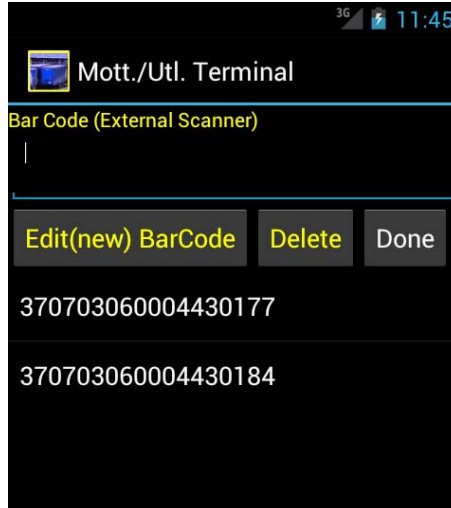

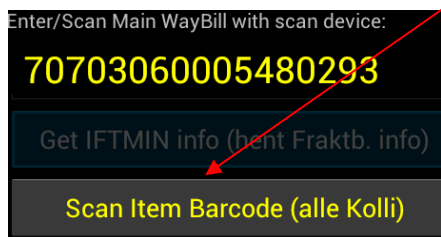

3a – info fra IFTMIN/transportsiden.no

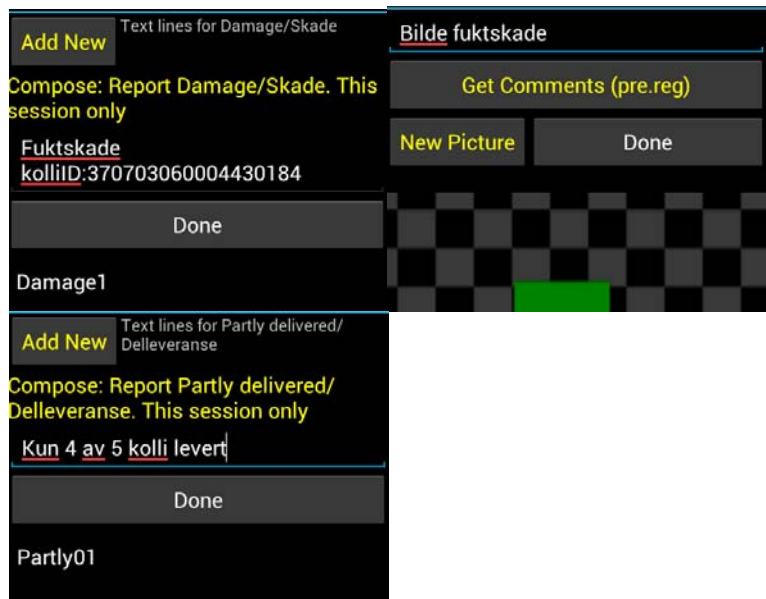

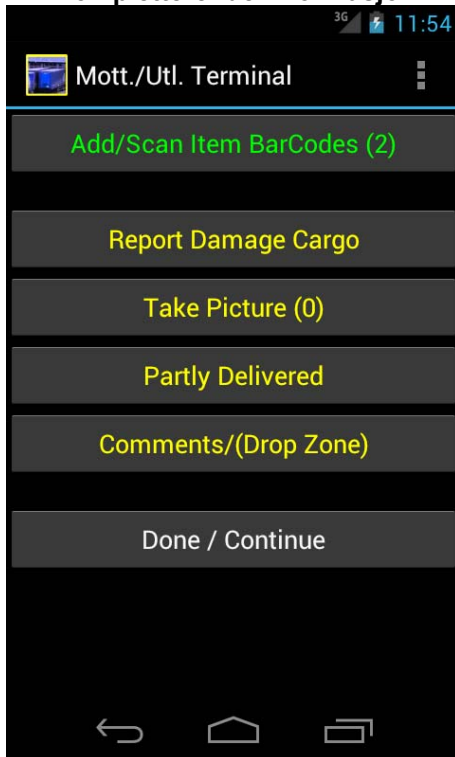

3b – Fraktbrev er ikke registrert

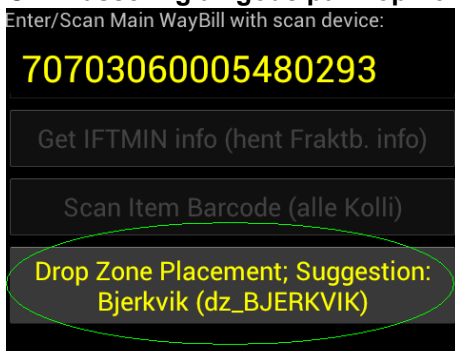

4 – Skanne all kolli ID/strekkoder

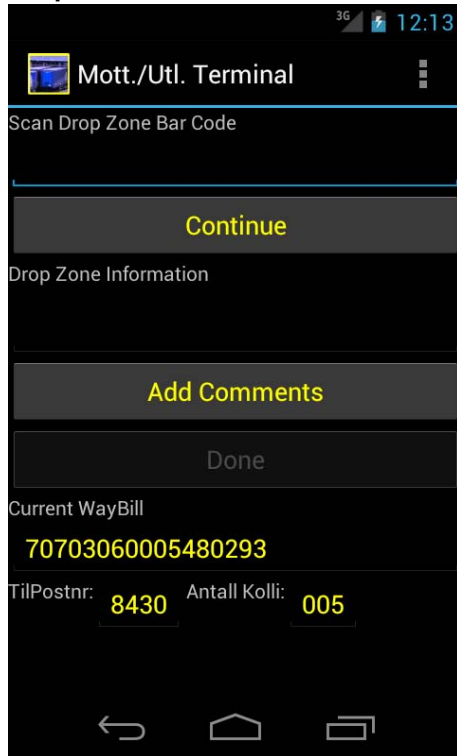

5 – Mulighet for registrering av kompletterende informasjon

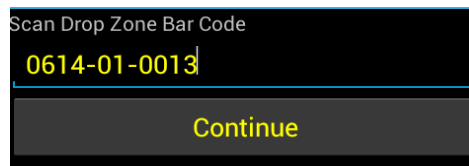

6 – Plassering av gods på Drop Zone

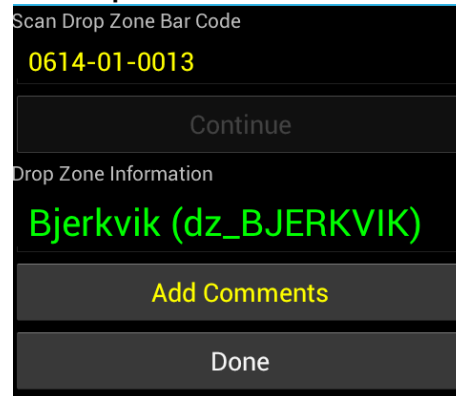

Drop Zone Placement

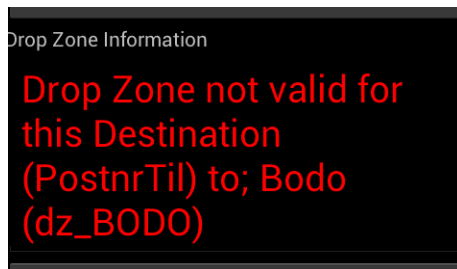

7 – Skanne DropZone code

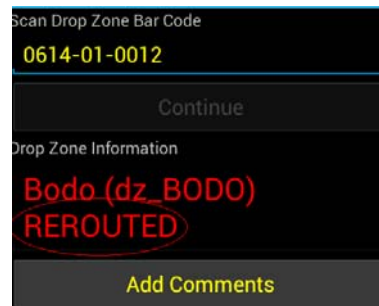

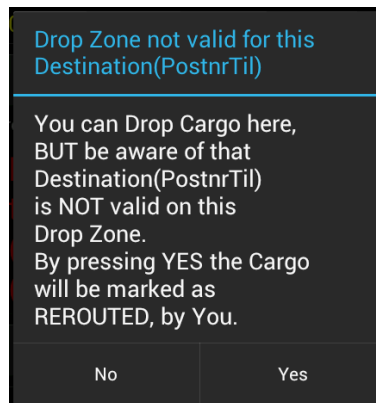

8a - Drop Zone OK

8b Drop Zone NOT OK

8c Akseptere "annen" Drop Zone

8d Kommentar registreres "Add Comments"

Annet

Alle kontroller som PDA-en kan utføre.

For eksempel avvik i Antall kolli.

The screenshot shows a PDA application interface. At the top, it says 'Mott./Utl. Terminal'. Below that, 'Til POSTnr:' is followed by the number '8430'. Underneath, 'Antall Kolli:' is followed by the number '003', which is circled in red. Below this, there are fields for 'Angi L, B, H i cm. (eks. 090/070/100)' with sub-fields for 'Lengde:', 'Bredde:', and 'Høyde:'. A 'Continue' button is visible. At the bottom, 'Postnr(Til):' is '8430' and 'Antall Kolli:' is '5', also circled in red. Below that, it shows 'Vekt, DMQ/CBM, Lastemeter' with values '1085 KGM, 2170 DMQ, 1,10 MTR'. At the very bottom, 'Mottaker' is 'TOR EKRAN AS, HAVNEGT. 20, 8430'.

The screenshot shows a dialog box with a black background and white text. The title is 'Til POSTnr: 8430'. The main text reads: 'Number of Packages differs from IFTMIN!!!'. Below this, it asks: 'Do You want to continue? Press No to change Number of Packages. Press Yes to add a comment / explanation why you are accepting this difference.' At the bottom, there are two buttons: 'No' and 'Yes'.

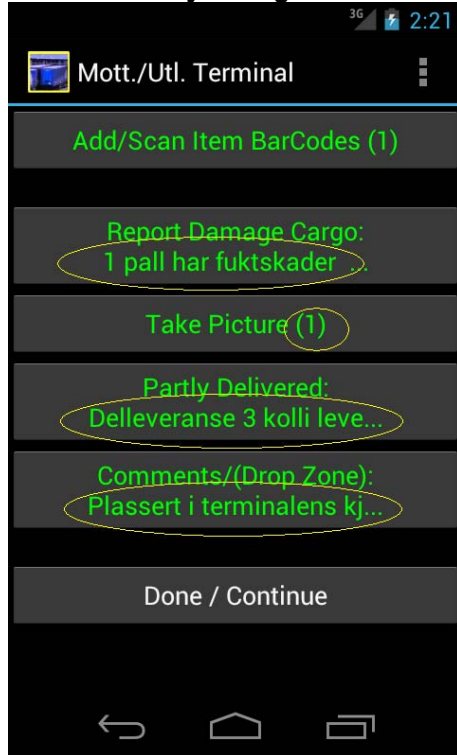

Man blir nødt til å rapportere avvik

The screenshot shows a form for reporting a discrepancy. It has a title 'Add New' and a subtitle 'Text lines for Partly delivered/ Delleveranse'. The main text reads: 'Compose: Report Partly delivered/ Delleveranse. This session only'. Below this, it says 'Delleveranse 3 kolli levert'. At the bottom, there is a 'Done' button and the text 'Partly01'.

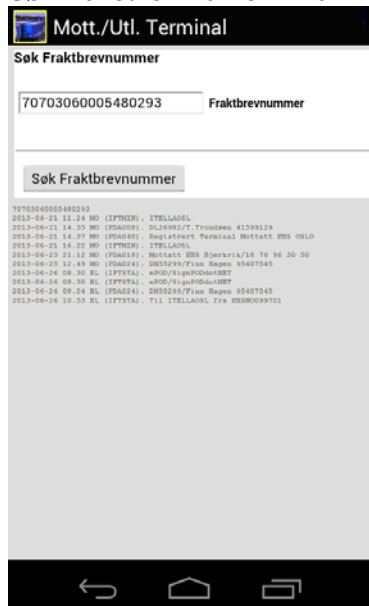

Andre avvik kan for eksempel være:

1. Avvik i Postnr(til) fra IFTMIN kontra hvor godset skal sendes i flg. fraktbrevet.
2. Avvik i antall skannede kolliID strekkoder i forhold til antall kolliID angitt i IFTMIN/transportsiden.no.
3. Urimelig forhold mellom i IFTMIN angitt DMQ/CBM/Lastemeter og registrerte L,B,H.
4. Angitt Postnr(til) i IFTMIN som ikke er kjent i KHS sine Postnrregister for Drop Zoner/WEB-fraktberegning.

Scan Summary for å gi oversikt
